I've tried changing the setting to 'Download and Keep Originals' but it never makes any progress.. It's only 4 GB of photos and I have over 30 GB free so memory is not the issue So my question is: How can I download my full resolution photos from iCloud to my new iPhone 7 plus?.. I had my iCloud set to 'Optimize Storage' on my old phone so most of my photos in my current phone are the low resolution versions.

I recently upgraded to a 128 GB iPhone 7 plus from a 16 GB iPhone 5s, so I finally have space for my photos.
